Covid-19 haunts human populations across the World for more than a year since it became pandemic in March 2020. It infected millions of people and inflicted a huge loss of life globally. The recent second wave swept the whole country and proved quite detrimental. Largely, it affected adults and the elderly. Prof. Somasekar, Executive Board Member 2021 of Indian Academy of Pediatrics will give a brief on the impact of Covid-19 on children, threats and necessary protocols for the safety of children
